

## MONTAGEANLEITUNG

GEWÄCHSHAUS LINEA II HKP

GERÄTERAUM LINEA II AVP

BITTE VOR DEM AUFBAU LESEN

Technische Änderungen vorbehalten

STAND: 04/2021

## Liebe Garten- und Pflanzenfreunde,

erst einmal möchten wir Sie zum Kauf eines Qualitäts-Produkts "Made in Germany" aus unserem Angebot beglückwünschen und Ihnen für Ihr Vertrauen in unsere Arbeit danken.

### Montage

Die Montage des Gewächshauses bzw. des Geräteraums ist einfach und kann größtenteils von zwei Personen durchgeführt werden.

Der Zeitaufwand hängt von vielen Faktoren ab und lässt sich in etwa mit einer Zeitspanne von einem Tag bis hin zu drei Tagen beziffern. Wichtig ist hierbei, dass das Endergebnis stimmt und Sie zufrieden sind.

Sollten Sie die Montage nicht selbst durchführen wollen, finden Sie im Servicebereich unter

**www.kgt-gmbh.de**

einige Montagepartner, die die Montage gern für Sie ausführen.

Sie können bei Rückfragen auch gern unseren Kundenservice telefonisch kontaktieren:

**Tel. (0049) 0 49 56/40 75-0.**

Sie erreichen uns von  
Mo. bis Fr. von 07:00 - 17:00 Uhr.

### Lieferumfang

Bitte arbeiten Sie die einzelnen Arbeitsschritte in der Reihenfolge der Montageanleitung ab. Bitte nicht alle Kartons gleichzeitig öffnen! Lassen Sie sich nicht durch die Vielzahl der Einzelteile verwirren.

Bevor Sie mit der Montage beginnen, prüfen Sie anhand der Stücklisten, ob alle Teile vorhanden und unversehrt sind. Jeder Karton durchläuft eine strenge Qualitätskontrolle, bevor er verschlossen wird. Durch diese und andere Maßnahmen können wir Fehlteile nahezu ausschließen. Sollte dennoch etwas nicht in Ordnung sein, geben Sie uns eine Information unter der

**Tel. (0049) 0 49 56/40 75-0 bzw.  
per e-mail: [info@kgt-gmbh.de](mailto:info@kgt-gmbh.de)**

Wir kümmern uns dann kurzfristig um Ersatz.

Beachten Sie bitte, dass bei einer pressblanken Konstruktion leichte Kratzer bzw. Schleifspuren an den Aluminiumprofilen herstellungsbedingt nicht vermeidbar sind und keinen Reklamationsgrund darstellen. Bei Fragen hierzu können Sie uns gern kontaktieren.

## Sicherheitshinweise

Das Objekt sollte möglichst an einer windgeschützten Stelle und nicht bei stürmischem Wetter aufgestellt werden. Es ist gefährlich, ein teilweise montiertes Modell ungeschützt der Witterung auszusetzen.

Bei vorschriftmäßiger Montage widersteht dieses Objekt auch heftigem Wind. Bei Unwetter müssen Sie die Fenster und Türen schließen und ggf. zusätzlich sichern. Der Hersteller übernimmt keine Verantwortung für Schäden, die durch höhere Gewalt entstehen. Der Geräteraum ist von Schneelasten höher als 10 cm zu befreien. Keine offene Feuerstelle im Geräteraum errichten. Arbeiten Sie mit sicheren, handwerksgerechten Werkzeugen. Achten Sie bei der Montage auf einen sicheren Stand der Leiter (Unfallgefahr!). Grundsätzlich nur mit Handschuhen arbeiten (Verletzungsgefahr, Schnittgefahr!). Der Geräteraum ist zur ortsfesten Nutzung vorgesehen und muss daher auf einen geeigneten Untergrund verankert werden.

**Warnung!!!**

### Lebens-/Unfallgefahr für Kleinkinder und Kinder

Bitte lassen Sie Ihre Kinder niemals unbeaufsichtigt mit dem Verpackungsmaterial spielen. Es besteht Erstickungsgefahr. Während der Montage des Produktes sollten Sie Ihre Kinder vom Aufbauort fernhalten, da im Lieferumfang Kleinteile mit Erstickungsgefahr und scharfkantige Profile enthalten sind.

Das Produkt ist kein Kletter- oder Spielgerät, daher lassen Sie Ihre Kinder nicht unbeaufsichtigt.

Stellen Sie sicher, dass sich Personen, besonders Kinder, nicht auf das Produkt stellen, hochziehen oder hineinklettern, da Kipp-/Erstickungsgefahr besteht. Es ist sicherzustellen, dass das Produkt auf einem festen und ebenen Untergrund steht.

Verletzungen und/oder Sachschäden können die Folge bei Nichtbeachtung der o. g. Punkte sein.

### Für den Aufbau benötigen Sie folgende Werkzeuge:

- 1 Stück Kreuzschlitzschraubendreher
- 1 Stück Maul- bzw. Gabelschlüssel 10 mm
- 1 Stück Wasserwaage
- 1 Stück Stehleiter
- 1 Stück Feile, um evtl. Grat an den Profilen zu entfernen
- 1 Stück Maßband
- 1 Stück Schere/Messer
- 1 Stück Bohrmaschine

### Identifizieren der Profile

- 1. Querschnitt beachten
- 2. Abmessungen nehmen

## Hinweise zu den Aluminium-Verbundplatten

**Auf keinen Fall gleich nach dem Auspacken die Folien abziehen, damit die Platten nicht verkratzen, etc.**

Die Schutzfolien sollten Sie zunächst immer nur im Randbereich lösen und erst nach der fertigen Montage komplett entfernen. Setzen Sie die Aluminium-Verbundplatten auf keinen Fall längere Zeit der Sonneneinstrahlung aus. Die Folie könnte unter Umständen auf den Platten einbrennen und nur noch schwer lösbar sein.

## Hinweise zur Verglasung

Die ISO-Hohlkammerplatten, sprich Verglasung, wird immer mit der Seite mit dem UV-Schutz außen eingebaut. Die Platten haben auf der Schutzfolie einen entsprechenden Hinweis bzw. eine farbige Folie.

**Auf keinen Fall gleich nach dem Auspacken die Folien abziehen, da Sie sonst nicht mehr erkennen können, welche Seite den UV-Schutz hat!**

## Bestimmungsgemäße Verwendung

Das von Ihnen erworbene Produkt ist für die Anzucht von Pflanzen bzw. zur Aufbewahrung von unempfindlichem Gartenzubehör konstruiert und sollte auch ausschließlich dafür genutzt werden. Nicht zur Lagerung ätzender oder brennbarer Chemikalien oder Produkte empfohlen.

## Haftungsausschluss

Bei bestimmungswidriger Verwendung und bei Nichtbeachten der Sicherheitshinweise übernehmen wir keine Haftung für Schäden/Folgeschäden an Personen oder Elementen. Die Firma KGT - Kreative Gartentechnik GmbH übernimmt keine Haftung für die sich im Objekt befindlichen Gegenstände. Es obliegt dem Endanwender den Inhalt regelmäßig zu überprüfen. Bitte beachten Sie, dass der Hersteller weder für die Folgen haftet, wenn das Modell, nicht nach diesen Anweisungen aufgestellt wird, noch für Schäden aufgrund der Witterung oder höherer Gewalt.

## Versicherung

Wir weisen Sie darauf hin, dass nicht alle Versicherungen automatisch Geräteräume abdecken.  
Bitte erfragen Sie dies bei Ihrer Versicherung.

## Wasser und Kondensat

Je nach Wetterlage bzw. Niederschlägen können Undichtigkeiten auftreten sowie Kondensatbildung an den Hausinnenseiten und im Inneren der Hohlkammerplatten. Dieser Effekt tritt auf, da die ISO-Hohlkammerplatten nicht "wasserdampf-diffusionsfest" sind, d. h. Feuchtigkeit tritt in Form von Wasserdampf in die Platte ein und führt u. a. zu einer "beschlagenen" Optik. Dies ist ein rein optischer Effekt und lässt sich bei korrekter Ausführung der Verglasung nicht vermeiden. Die Platten können dadurch keinen Schaden nehmen, auch nicht bei Frost. Die Wahl des Standortes und ausreichendes Lüften können diesen Effekt verringern.

## Pflege - Instandhaltung

Den Geräteraum nur mit viel Wasser, z. B. weicher, nicht kratzender Autowaschbürste abwaschen. Die Verwendung eines Hochdruckreinigers wird nicht empfohlen. Bei stärkerer Verschmutzung können Sie zusätzlich eine milde Seifenlauge (keine Bleiche, Ammoniak oder alkalische Reiniger!) zur Unterstützung der Reinigung verwenden. Achten Sie in solchen Fällen auf die Verwendungshinweise des verwendeten Mittels. Wir übernehmen keine Haftung für Schäden, die im Rahmen unsachgemäßer Anwendung falscher Reinigungsmittel auftreten. Schrauben, Muttern, Bolzen usw. regelmäßig prüfen und gegebenenfalls nachziehen/schmieren.

## Eine Bitte an Sie

Für unsere Werbemaßnahmen sind wir ständig auf der Suche nach neuem Bildmaterial. Gern können Sie uns nach erfolgter Montage einige Aufnahmen Ihrer neuen Oase im Grünen zuschicken, idealerweise in digitaler Form. Richten Sie Ihre Nachricht einfach an:

[info@kgt-gmbh.de](mailto:info@kgt-gmbh.de)

Wir bedanken uns vorab für Ihre Mühe und freuen uns auf Ihre Impressionen.

# GRÜNDUNG

Fundamentrahmen (A)

Streifenfundament (B)

## GRÜNDUNG A

### Fundamentrahmen zum Eingraben (Optional)

Dies ist die einfachste und sicherste Gründung eines Gewächshauses.

**Achtung:**  
**Auf keinen Fall vorab montieren!**  
**Montage erfolgt zusammen mit dem Gewächshaus.**

Der Fundamentrahmen wird kraftschlüssig in das Bodenprofil des Gewächshauses eingehakt und in den Ecken mit einem Eckwinkel verschraubt.

Hinweis:  
Das Fundamentrahmenprofil ist in der Länge kürzer als das Bodenprofil.

## Aufstellen mit dem Fundamentrahmen

Einen kleinen Graben (Spatenstich, ca. 10 - 12 cm tief) in den Abmessungen des Fundamentrahmens ausheben. In den Ecken möglichst je einen Pflasterstein waagrecht zu den anderen einsetzen. Diese dienen dann der sicheren Auflage und verhindern ein evtl. Absacken des Gewächshauses. Das Gewächshaus mit dem Fundamentrahmen in diesen "Graben" stellen und mit Erde anfüllen.

Zweckmäßig ist auch das Anlegen von Gartenplatten oder einem Steinpflaster, damit das Gewächshaus (z. B. bei starkem Regen) nicht von Schmutzspritzern überzogen wird. Außerdem gestaltet sich so das Arbeiten rund um das Gewächshaus einfacher (Rasenmähen, etc.).

Abb. ähnlich

## GRÜNDUNG B Streifenfundament

Sollten Sie keinen Fundamentrahmen gekauft haben, muss die sichere Gründung mittels Streifenfundament erfolgen.

Erstellen Sie dann bitte ein solches Fundament gemäß den in der Tabelle beigefügten Maßvorgaben.

Sie haben auch die Möglichkeit Ihr Gewächshaus auf Tiefbordsteinen zu gründen.

Als Beispiel: 50 x 25 x 8 cm - oder besser -  
50 x 30 x 10 cm

Beachten Sie bitte, dass das Fundament gleichmäßig waagrecht hergestellt wird. Das Gewächshaus dann bitte mit den mitgelieferten Befestigungswinkeln & Dübel 8/10 mm (mindestens 2 Stück pro Seite) sicher im Beton verankern.

Schrauben und Dübel gehören nicht zum Lieferumfang.

| Modell              | Fundament |     | Gewächshaus |     |     |     |

**Übergänge zwischen Profil und  
Hohlkammerplatte mit beiliegendem  
Silikon versiegeln.**

**Achtung:  
Dieser Schritt gilt für Gewächshaus  
und Geräteraum.**

**Übergänge zwischen den Profilen  
mit beiliegendem Silikon versiegeln.  
Achtung:  
Dieser Schritt gilt für Gewächshaus  
und Geräteraum.**

## Montage der Keildichtung 1-2 mm (Gilt auch bei 4-6 mm)

1. Keildichtung 1-2 mm im Doppelstrang

2. Die Keildichtung in der Mitte auseinanderziehen

3. Kürzen Sie die Dichtung, sodass diese etwas länger ist (ca. 2 %) / Hinweis: Dichtung zieht sich zusammen

4. Die Enden auf beiden Seiten in das jeweilige Profil einstecken

5. Detailansicht: Ein Ende der Keildichtung im Profil

6. Die Dichtung auf der gesamten Länge des Profils gleichmäßig eindrücken (Abb. zeigt die Dichtung nicht final eingekellt)

7. Die Dichtung nun vollständig in das Profil drücken

8. Die im Profil montierte Dichtung im Querschnitt

9. Alternativ kann ein Hilfsmittel zur Montage verwendet werden

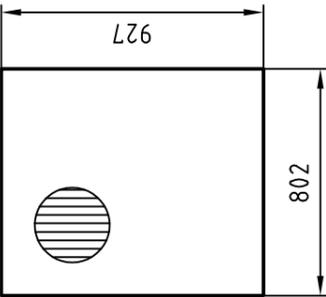

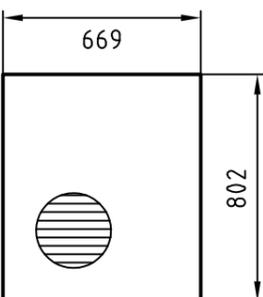

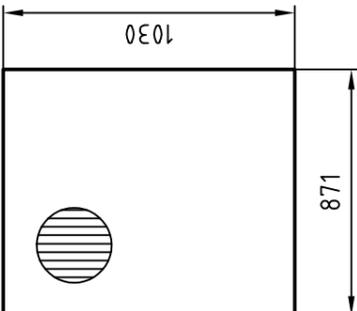

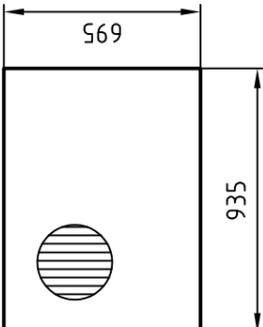

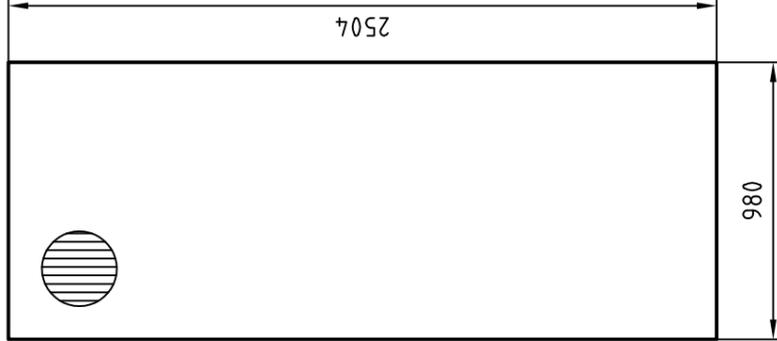

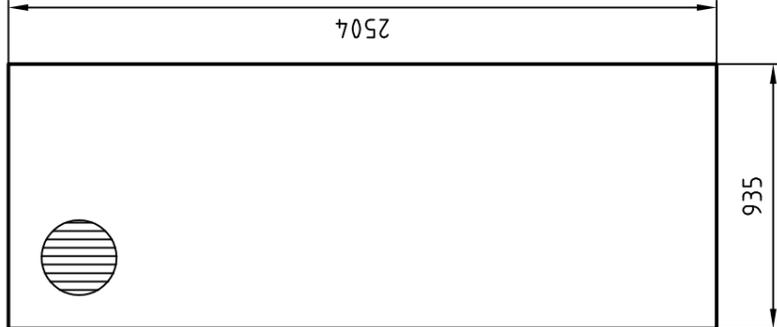

Geeignete Hilfsmittel zur Montage der Dichtung können z.B. sein:

- Kunststoffspachtel
- dünnes Holzbrett mit stabiler Kante
- Eiskratzer
- oder Ähnliches

Bitte achten Sie darauf, dass die Oberfläche nicht verkratzt!
